

P3 PAINT MIXING GUIDE

This guide shows the **shade**, **highlight**, and **top +highlight** tones for each **base** color.

These are intended to be mixed with the base color you are using to create a subtle progression of tone. For example, when highlighting Thornwood Green, do not use straight Rucksack Tan; just add a little Tan to the Green and highlight with that. Then add a little more and highlight with that, and continue until you have created a subtle progression of color. You can carefully blend each color, or you can just layer them on top of each other.
